Digital Cultural Heritage e-Infrastructure

Presentación al caso de investigación en exposiciones virtuales. Directrices para la realización de exposiciones virtuales online

Maria Teresa Natale
Istituto centrale per il catalogo e la documentazione

Barcelona, 14 June 2011

- One of the main goals of public and private cultural institutions (GLAMs) is the promotion and dissemination of knowledge.
- They accomplish their mission thanks to knowledge dissemination tools that include, among others, **temporary and permanent exhibitions** and **exhibits** that follow codified models, whose goal is to expose citizens to the national and international cultural and artistic heritage.

The meeting between the languages and methods of traditional cultural promotion (**non-virtual exhibits and exhibitions**) and the promotion and dissemination of knowledge through web-based methods (**online virtual exhibitions**) have made it necessary to draft **shared guidelines and recommendations** that encourage the use of the web and maximize its potential.

This guidelines, edited by MiBAC, aims to illustrate the state of the art in online virtual exhibitions, both on the basis of the actual experience accrued by various Italian institutes and the observation and analysis of international products.

Aim: to clarify some concepts that in literature are not yet fully codified, and give some recommendations to institutions who want to realise projects.

1. CONCEPTS AND DEFINITIONS

- 1.1 Expositions, exhibitions, and shows
- 1.2 Online virtual exhibition
 - 1.2.1 Thematic route
 - 1.2.2 Digital item
 - 1.2.3 Hypertext, hypermedia, multimediality, interactivity
 - 1.2.4 Information architecture

Glossary

- The term **exposition**, in its broadest sense, indicates the rational process through which one attempts to divulge a concept or topic by explaining its logical content or linking it to other concepts or topics that help highlight its meaning
- The terms **exhibition** and **show** indicate events with a specific venue and time, during which the public can enjoy a series of objects, paper and/or multimedia documents, books, paintings, sculptures, and other items, related to one another and organized according to logical, thematic, spatial, historic, and/or authorial criteria, and made accessible either permanently or temporarily, through one or more narrative routes, with scientific, didactic, and/or promotional goals.

Glossary

Cultural institutions are increasingly recurring to exhibitions that fall outside the traditional space/time parameters, and are instead staged on IT platforms accessible via the web. These are **online virtual exhibitions**.

An online virtual exhibition is a hypermedia collection accessible via the web, and made up of digital items which are:

- **linked together** by a common theme, an inter-disciplinary topic, a concept, an idea, an anniversary, a special event, or a physical person
- **displayed in 2D or 3D**
- occasionally memorised in **distributed networks**
- made accessible through the potential provided by modern technology, thanks to a **system architecture** designed to provide user-centred, absorbing experiences
- **dynamic products** that can offer services and be updated periodically.

- Virtual exhibitions are often generated by real events, even though they may result in products that are autonomous, due to the web language they use.
- Online virtual exhibitions can be staged with more or less sophisticated IT tools, depending on the degree of complexity and the goals in question.

- The most basic exhibitions serve as an **advertising showcase for real events**, including through an ad hoc website. These are often part of a broader set of coordinated marketing actions, whose main goal is to increase the number of visitors to the exhibition. These websites generally comprise a series of informative pages and a photo gallery featuring the exhibition's highlights.

- One step up on the complexity ladder are **virtual visits to real exhibitions**, based on a specific web project aiming to depict the exhibition's actual arrangements, and allowing users to approximate as much as possible a real visit, enhanced at times by information pages. Sometimes users need to download specific software in order to access this service.

- The most sophisticated are **complex virtual exhibitions** making full use of the conceptual, instrumental, and linguistic tools provided by new technologies, and using the full extent of their potential.

- In summary, a collection of digital items, in and of itself, does not constitute a material or virtual exhibition. It is only when the items are carefully selected to illustrate a topic, and are tied together forming a narrative or a logical itinerary, that they constitute an exhibition.
- Online virtual exhibitions, independently of degree of sophistication of the technology used, can and must be put together in such a way that they can provide alternative experiences to the real event, which can involve the user in a process of discovery, knowledge acquisition, and learning.

Definition of the architecture

The three macroareas of a virtual exhibition: contents, information, services

- 2.1. Conception
 - 2.1.1 Brainstorming
 - 2.1.2 Thematic relations
 - 2.1.3 Virtual exhibitions and thematic routes for educational purposes
- 2.2. From planning to creation
 - 2.2.1. The project team
 - 2.2.2. Selection of digital resources
 - 2.2.3 Definition of the architecture: contents, information, and services
 - 2.2.4 The technology to be used
 - 2.2.4.1 Mobile devices
 - 2.2.4.2 Augmented reality
 - 2.2.5 The budget
 - 2.2.6 Definition of operating phases and timeline
- 2.3 Testing, publication, communication, and dissemination
 - 2.3.1 Testing and publication
 - 2.3.2. Communication and dissemination
 - 2.3.2.1 Traditional communication tools
 - 2.3.2.2 Social media marketing
- 2.4 Updating, maintenance, and conservation

3. EIGHTEEN RECOMMENDATIONS AND ONE PIECE OF ADVICE

4. TOOL KIT

4.1 Graphic design

4.2 Text style

4.3 Multi-media resources

- 4.3.1 Still Images
 - 4.3.1.1 OCR: text conversion
- 4.3.2 Audio
- 4.3.3 Video
- 4.3.4 3D
 - 4.3.4.1 Computer graphics
 - 4.3.4.2 Immersive photography
 - 4.3.4.3 Anaglyph images

4.4 Copyright, re-use of content, and access modalities

Welcome!

Welcome to *Eggs - A Virtual Exhibition*, the closest you may ever get to seeing wild bird eggs without disturbing birds at the nest. This virtual exhibit showcases eggs of the world with a special emphasis on the eggs of Alberta. The Royal Alberta Museum hosts one of the most extensive egg collections in North America. We have an on-line field guide with over 300 egg images as well as information on egg biology and a touch of egg trivia. So put on your virtual helmet and we'll visit some nests!

We welcome comments and feedback on this presentation. Please [contact us](#)!

You are in *Eggs - A Virtual Exhibition* which is part of *Birds - A Virtual Exhibition*, part of the [virtual Museum of Canada](#).

MoMA

Art Nouveau

virtual exhibition

Introduction

For a brief and brilliant period at the end of the 19th century - starting around 1890, and lasting off before World War One - Art Nouveau dominated the cultural scene. Everything from domestic furnishings and decorative art to architecture and advertising was characterised by its curvilinear elegance and organic forms inspired by nature. Even today, more than a century after the emergence of Art Nouveau, artists and designers continue to be inspired by the floral elements, natural features and colours of this enduring style.

Street art, graffiti, murales in Italia e nel mondo

Home > Mostre Virtuali > Personali Su Artisti > INSEGUENDO L'ORMA

Inseguendo l'Orma

a cura di Lucio il segno

inseguendo ... l'orma

1 febbraio 2008: il sito delle mostre virtuali di Lucio il segno continua con una personale del writer Orma (Lucio Zarr) diffusa in 6 province di Roma, ad Anzio: VIAGGIO LUNGO LA STRADA.

La mostra virtuale è costituita da sei sezioni introdotte dall'artista.

Orma parla di sé (Colloquio)

- help **promote** the cultural heritage preserved by the institution
- are a **learning** tool that helps enhance knowledge
- can make accessible an **amount** of documents and items that is much greater than what any material exhibition could ever manage to display
- can make accessible to the public the **most valuable** works and documents, without putting the national and international cultural heritage at risk

Advantages

- help users **enjoy** documents and works that may not be accessible otherwise
- make it possible to **view parts and details** of works that could not otherwise be seen, not even through the direct observation of the original
- remain accessible **over time**, since they are not limited to the duration of the actual event
- can almost always be “visited” **free of charge** by users from **all over the world**, who may not be able to visit the actual exhibition

- they are **dynamic**, since they can be modified even after they have been changed, both with regards to planning aspects and to their activities and contents
- can be enhanced by the **contributions of users**
- they can be staged even on limited budgets, and are **less expensive** than actual exhibitions
- they can **serve as an online archive** for information related to the material exhibition
- they can have positive repercussions on the **tourism industry**.
